MRL Traction Elevator

Best suited for
Low- to medium-rise buildings

Advantages
Eliminates traditional machine room
Reduces power consumption
Greater speeds than hydraulic systems
Less expensive than geared traction systems
Accommodates front and rear openings
MRL Traction Elevator

BUILT TO LAST
Schumacher Elevator Company manufactures complete elevator systems and components, including passenger, freight, LULA, residential, and special purpose personnel elevators.

(800) 779–LIFT (5438)

MRL technology continues to evolve with greater design freedom for architects, as well as valuable savings in construction and operational costs.

The MRL Elevator utilizes a gearless traction type machine, which results in superior performance and ride quality when compared with hydraulic elevators. MRLs can also operate at faster speeds, increasing the perception of quality above a conventional hydraulic elevator.

All Schumacher MRL traction elevators meet or exceed all requirements set by the American Society of Mechanical Engineers (ASME A17.1).

Dimensions are subject to change without notice.
