Schumacher
ELEVATOR

Electrical Engineer

Schumacher Elevator Company is searching for an innovative problem-solver with a passion for control technology to join our team and help in the design, development, and troubleshooting of elevator control systems and components for passenger and freight elevators.

What you need for this position:

- Bachelor's degree in Electrical Engineering, Electrical Engineering Technology, or a related field
- 2+ years of experience in electrical design, software design, controls, or automation engineering
- Hands-on experience building, testing, and troubleshooting control systems
- Embedded design experience, C++ programming
- Strong analytical and problem-solving skills
- Excellent communication and collaboration skills
- SAP system knowledge a plus
- Valid driver's license

What you'll be doing:

- Designing custom control panels, generating schematics and technical documentation, and assisting with assembly and testing
- Developing, programming and modifying PLC logic and HMI interfaces
- Investigating field issues and providing technical support to service, installation, and customers, either on jobsites or remotely
- Participating in product development, testing, and validation of control systems
- Interfacing with customers and in-house professionals

The details:

For almost 90 years Schumacher Elevator has been a well-known and respected family owned and operated company that designs, manufactures, and services custom passenger and freight elevators.

Position is full-time, first shift. Benefits include medical, dental, life and disability insurance, 401(k) match, PTO, paid holidays and bonus eligible. Pre-employment drug screen and background check required.

We are an equal opportunity employer.

Ways to Apply:

Apply directly online at www.schumacherelevator.com/careers by uploading your resume and application.
